Project "Our Patients"

Att: Stephen Krucher

When I learned at 81½ I needed mitral valve surgery and met with Dr. Adams who explained in detail the Carpentier ring repair and hospital stay, my family and I were confident we were in the very best of hands. Everyone from Theresa overlooking the excellent after-care I received with a team of exceptionally caring nurses, made a frightening open heart procedure comfortable and safe.

A seemingly tireless team of doctors, and Dr. Adams in

imbued with Mr. David Adam's
passion for excellence and his profession.

You are free to edit this
information at your will.

Good luck,
Paul

particular, were there before and
post surgery for me. Life four years
later is still busy with keeping home
with a wonderful husband of 67 years
in a two floor house. We're still
hosting our three children, grandchildren
and I was able to play on the floor
with a 15 month old great grandbaby.
I've continued to plant and tend a
summer garden, drive locally, read
the N.Y. Times, New Yorker, books
and attend theatre every month in
N.Y. riding the L-I.R.R. I've slowed
up (for me) but at 86 life is full
and I feel grateful!

Thank you, Thank you to
a superb surgical team seemingly
